Whether you're an experienced marketer or new to the world of referrals, our program is accessible to individuals from all walks of life.

REFERRAL INCOME:

Referral income at 9XP is a lucrative opportunity for users to earn additional income by referring new traders or investors to the platform. When a user becomes a part of 9XP's referral program, they are given a unique referral link or code that they can share with others.

Whenever someone clicks on their referral link or uses their referral code to sign up and subsequently engages in investing on the 9XP platform, the referrer earns a referral commission of 10%. This commission is a percentage of the invested amount by the referred user.

The referral income can be a continuous stream of earnings, as long as the referred users remain active on the platform. 9XProfits offers seamless direct referral income on every investment made by your downline. Withdraw these earnings without the need to activate a package

BINARY INCOME

Binary income at 9XP is a unique earning opportunity that allows users to build a binary network and earn additional income based on the investment activities of their network members. 9XP offers flat 10% Binary earnings to every user. These earnings are credited at every day end and users rejoice the option to withdraw them immediately or at all times.

Here's how the binary income works at 9XP:

- » **Binary Structure:** When a user joins the binary income program, they are placed at the top of a binary tree structure. This top position is known as the "sponsor" or "upline."
- » **Two Legs:** The binary tree consists of two legs - a left leg and a right leg. As the sponsor, the user has the opportunity to recruit and place new members in their downline, which will fill the left and right legs by sharing left and right referral links.
- » **Volume Accumulation:** Each investment made by the members in the binary network contributes to the total volume generated in each leg.
- » **Matching Bonus:** Users are eligible to earn a matching bonus of 10% based on the investment volume of their weaker leg. The matching bonus is a percentage of the volume generated by the weaker leg, encouraging users to balance and grow both legs of their binary network.
- » **Binary Capping Limit-** This is set to ensure fair distribution and to maintain stability in the platform. This amount is the **MAXIMUM LIMIT** of binary earnings that a user can earn on every **SINGLE DAY**.

REINVESTMENT STRATEGY:

This is an option where users can opt to invest in a new package using the funds available in their Savings and Current wallet. A mandatory 50% or more of reinvestment needs to be done by Crypto payment and the rest could be utilised from any of the wallets. Meaning for an investment of \$1000 users has to pay \$500 from cash and rest from his 9XP wallet balances.

Along with this we bring you flexibility at its best. Our reinvestment strategy now allows you to pay maximum amount of reinvestment using Cryptocurrency and balance from the wallets. Let us consider a user seeking to reinvest \$1000.

The user can opt to invest \$600, \$700 or \$900 using crypto and remaining using the wallet balance

An illustration describing our latest approach to reinvestments:
